

Get Help

The *Get Help button* will place an Emergency phone call to your public safety department. A map with your GPS location will allow responders to get to you quicker.

Services and Tips

Services and Tips will direct you to other additional app features such as iReports and your Profile.

Friend Watch

Friend Watch is a peer to peer way to look after your friends. Set Friend Watch contacts in your profile and a text alert will be sent when you set, arrive, or fail to check in with the app. A map with your GPS location and coordinates will also be provided to your emergency contacts.

Crime Map

If your institution has opted for the *Crime Map* feature, you will see a map location of your area with surrounding crime incidents to watch out for.

Where's the Shuttle

If your institution has opted for the, *Where's the Shuttle* feature, you will see your institution routes, times the bus stops at that location, and if included, a live GPS location of the bus you are waiting for.

StudentShield Apps are provided by:
911Cellular LLC.

Safety Escort

Safety Escort is a direct link to your institutions safety escort or transportation service. The phone number is already installed and ready in this button.

iReport

iReports are a way to send non-emergency activities to your local authorities. Your institution has suggested categories for you to report, a text field to fill out more information, the ability to upload a photo or video, and to report anonymously if you would like.

View Emergency Resources

View your institutions emergency policies, procedures, or other resources. Several types of reference materials may be here for your benefit so check back often for updates.

Profile

You will need to enter your secure PIN to get back into your profile information. Some of your information is mandatory upon downloading the app. The remaining information, including a picture, are highly recommended to better serve you in an emergency.
